## CHILDREN'S SOCIAL CARE

---

# #IUseEvidence

Birmingham

30<sup>th</sup> January 2019

**Join the What Works Centre for  
Children's Social Care's national event  
for social work practitioners interested  
in evidence-informed practice.**

An opportunity to discuss new  
evidence about how to create  
the best outcomes for children.

Become part of a movement of  
practitioners leading the charge  
for evidence-informed social  
work practice.

Spaces are limited so please  
contact:

# Better evidence for better outcomes

**The What Works Centre for Children's Social Care seeks better outcomes for children, young people and families by making evidence accessible, relevant and useful to children's social care practitioners and decision-makers, and fostering a culture of evidence-informed practice across the sector.**

We will achieve this by:

- working closely with leaders, practitioners, children, young people, families and researchers to inform the Centre's work
- collating, synthesising and reviewing existing evidence
- identifying gaps in the evidence base, and delivering new evidence through trials and evaluations
- developing, testing and publishing tools and services that support the more effective use of evidence
- championing the application of robust standards of evidence in children's social care research.

To follow our progress and to get involved, sign up for news and research updates from the Centre.
